

Installation Instructions

FORD F SERIES PET DIVIDER

PDFDPU15BK

FITS MODEL YEARS 2015 AND UP
EXTENDED AND CREW CABS

Thank you for purchasing a Dirtydog 4x4 pet divider. Please read these instructions fully to familiarize yourself with the installation. Set aside 20 minutes for the first time you install your pet divider. No tools are required for installation.

Step 1: Slide the aluminum bar into the top row of loops of the pet divider.

Step 2: Slide the J Hooks over both ends of the aluminum bar. The hook should face towards the front of the divider. (The front side has the Dirtydog label on it)

J HOOK

Step 3: Install shock cord hooks on the bottom of the pet divider as shown

Step 4: Hang the pet divider off the top of the trim at the top of the door pillar behind the front seat as shown in the photos.

Step 5 Insert the 1 inch strap through the J-Hook as shown

Step 6: Take the J- Hook and strap piece and insert it under the inner door pillar trim at the floor of the truck. Push it in until the hook grabs the underside of the trim. Do this on both the right and left side of the truck

Step 7: The strap you just installed can be fed through the bottom corner grommet of the pet divider. Tighten each side equally. Do not over tighten. This strap needs to be loosened if you wish to move the seat back further.

Step 8: Connect the two inner shock cords to the under side of the center console as shown.

Step 6: Attach the side straps to the grab handles at the doors. Tighten equally on both side. Your pet divider is now installed.

Your net comes with a 3 year warranty against manufacturing defects. Cuts, abrasions, sun faded items are not covered under the warranty.
